

SIGHT

Web Design Accessibility

INTRODUCTION

- RNIB suggest two million people in the UK are living with sight loss “significant enough to impact their daily lives”
- 3% of the population
- Wide range of conditions and severity

BLIND

- Some users are completely blind
- They may use screen-readers
- Desktop
 - Jaws
 - NVDA
- Mobile
 - Talkback
 - VoiceOver

PARTIALLY SIGHTED

- Other users have impaired vision
- They may also use screen-readers
- Zoom
 - Built-in tools
 - Third-party software
 - Browser zoom
- They may simply struggle
- Caused by a large range of conditions

COLOUR BLINDNESS

- Affects around 1 in 20 people
- Levels of deficiency vary
- Some combinations are more common than others
 - Red-green colour blindness, for example

EFFECTS

- Not be able to see
- May be blurry
- May have blindspots
- May only be able to see a small portion of the screen at a time
- May be unable to distinguish colour
