SEMANTIC HTML

Web Design Accessibility

WHAT IS SEMANTIC HTML?

- Semantic refers to the meaning of tags
- In HTML4, we used `<div>` and `<span>`
- These do not mean anything
- HTML5 goes a long way to address this problem by adding meaningful tags

HTML5 TAGS

Tag	Description
<header> <footer>	Header and footer
<nav>	Navigation
<article>	A piece of content
<aside>	Sidebar information
<figure>	Graph, chartt, diagram

HTML5 PAGES

```
<header>
  My Website
</header>
<nav>
  <ol>
    <li><a href="/">Homepage</a></li>
    <li><a href="/me">About me</a></li>
    <li><a href="/photos">Photos</a></li>
  </ol>
</nav>
<main>
  <article>
    <h1>My favourite places</h1>
    <p>
      These are my favourite places to visit on holiday.
    </p>
  </article>
  <aside>
    <h2>Related blog posts</h2>
    <ul>
      <li>My essential travel gadgets</li>
    </ul>
  </aside>
</main>
<footer>
  Thanks for visiting. Email me at: chris@example.com.
</footer>
```

SUMMARY

- We will go into more detail in the following lessons
- Make your choice of HTML tags meaningful
- Help the screenreader understand
- You can style elements however you wish, regardless of tag
