

TEXT

Web Design Accessibility

HEADINGS

- CSS can make a heading look like whatever you want
- Pages should have a single `<h1>`
- Can have multiple `<h2>` tags
- Headings should be hierarchical
 - Do not skip headings

Facebook is many things: a multimedia publishing app, perhaps the largest main in which children are sexually abus

The *New York Times* on Saturday put “explosion” in the online distribution of Facebook’s Messenger app in particular. 12 million of the 18.4 million world’s work material.” This report, authored by J.X. Dance, mentions encryption 13 Facebook said earlier this year it plans to make this platform by default, which will

TEXT LAYOUT

- Strong contrast (see colour lesson)
- Make it bigger
- Use paragraph tags
- Consider line spacing
- Font choices

LINE SPACING & TEXT LAYOUT

We had all of the weather on the run. I took my sunscreen with me and ended up applying some more to my arms mid-run. An hour later and heavy rain washed most of it off. I felt rather tight in my legs so I alternated between isotonic and cola at the feed stations (or, on one occasion, taking both). I purposely walked each feed station but otherwise ran all of the way.
